

Our Environmental Charter

At Rexel Group, we believe that striving for environmental performance will deliver efficiencies that benefit the environment, our customers and our company.

This Charter aims to inform our partners about our commitments and engage all employees on a daily basis, to fully embed environmental responsibility in the way we do business.

We are committed to:

Improve the environmental performance of **OUR BUILDINGS**

- by upgrading our facilities with energy-efficient equipment for lighting, heating, cooling, etc.,
- by managing, segregating and re-directing waste to recycling or other appropriate treatment channels,

Reduce the environmental footprint of **OUR OPERATIONS**

- by minimizing the use of packaging and paper,
- by optimizing transport flows and thereby reducing our fuel consumption and associated carbon emissions,

Develop and promote **SOLUTIONS** **FOR ENERGY-EFFICIENCY**

- by providing our customers with a wide selection of innovative products and services for energy management and renewable energy use,
- by training our sales force on up-to-date technologies and providing them with specific marketing and information materials.

Rexel

a world of energy
